

ORION
always connected

Australia's number one **Digital** two-way radio Network.

Always connected

THE ORION NETWORK ENSURES YOUR WORKFORCE IS ALWAYS CONNECTED, OFFERING UNRIVALLED DIGITAL TWO-WAY RADIO COVERAGE IN AND AROUND SYDNEY, NEWCASTLE, MELBOURNE, PERTH, CANBERRA, ADELAIDE, BRISBANE AND NEW ZEALAND.

Powered by Motorola's MOTOTRBO™ Connect Plus digital mobile radio technology (DMR), voice and data services are integrated into one device to enable clearer, faster and more versatile extended range communications.

Orion's scalable network platform offers flexibility for single and multi-site operations, with mobile and portable two-way radio solutions uniquely programmed to your requirements.

Multi-site digital trunking technology increases capacity and enables automatic site roaming over extended ranges, with superior voice clarity and secure transmission. Optional integrated data applications such as GPS location services, text messaging, data services and dispatch console capability can assist to improve operational productivity and safety performance.

Founded by a group of Australia's leading mobile communication experts, The Orion Network is backed by an aggressive growth strategy and serviced by the most comprehensive network of engineers and technicians in the industry.

The Orion Difference

- Unrivalled reliable network coverage across Australia with more repeater base stations than any other public access network
- Motorola's MOTOTRBO™ Connect Plus digital technology integrates portable radios, mobile radios, data applications, accessories and services
- Automating business processes through digital mobile radio technology
- Automated site roaming provides a seamless wide area network across Australia, eliminating the need for manual site selection
- Digital voice technology ensures superior audio clarity eliminating static over extended ranges
- Integrated data applications such as text, GPS location services and dispatch control provide command and control services from the comfort of your office
- Centralised dispatch capability when visibility and efficiency is critical
- Unique solutions engineered to individual business requirements
- Backed by leading mobile communication experts offering superior levels of service and support
- Provider of choice for the transport, logistics, local government, events, security, utilities and resource sectors

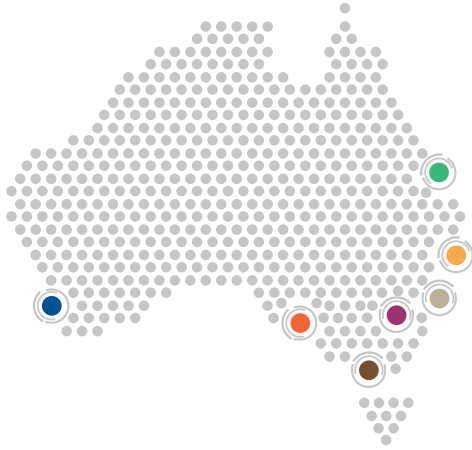

Orion Network
powered by Motorola

Unrivalled network coverage

THE ORION NETWORK IS BY FAR AUSTRALIA'S MOST RELIABLE DIGITAL TWO-WAY RADIO NETWORK PROVIDING UNRIVALLED COVERAGE IN AUSTRALIA AND NEW ZEALAND.

Orion repeater base stations are strategically located in each jurisdiction, automatically registering your location to ensure seamless roaming between sites. Full coverage maps are available on our website at www.orionet.com.au.

Flexible solutions for a mobile workforce

WHETHER YOU'RE IN AN OFFICE, FACTORY, STADIUM OR VEHICLE – THE ORION NETWORK PROVIDES CRITICAL SYSTEM FEATURES TO ENSURE YOUR WORKFORCE IS ALWAYS CONNECTED.

Feature	Benefit
Priority access	Assign a priority status to key personnel to ensure fast access for critical communications.
Automatic channel access	Efficient channel utilisation reduces the chance of queuing when you place a call or send data.
Enhanced security	A three-level security check assists to prevent unauthorised users, while the network manager's "disable feature" makes it easy to remotely deactivate a lost or stolen radio.
GPS services	Web based maps enable you to locate an employee, keep customers informed and re-trace movements to improve route planning and efficiency.
Data applications	Bolt on multiple data applications including GPS services, text messaging and dispatch console options, or customise bespoke applications through Motorola's developer program MOTOTRBO™.
Duress alert	Enable staff to call for help at the press of a button, dispatching instant visual alerts and location details to control centre operators.
Private calling	View caller ID and create unique talk groups for private conversations.
Digital voice quality	Built-in error correction techniques reconstitute voice at nearly its original fidelity throughout the coverage area.
Centralised dispatch capability	Tend to urgent customer requests, locate the nearest driver and arrange an urgent repair with an IP based console.
Contact list	Pre-programmed radio identification aliases enable greater efficiency in communication management.
Automated site roaming	Experience seamless communication as you travel without the hassle of manual channel changes.
Seamless maintenance	The network manager interface allows your network partner to add radios or even add sites without disrupting business activity.
Dedicated control slot	Quickly access voice and data services even during high traffic times.
