

Coverage Maps

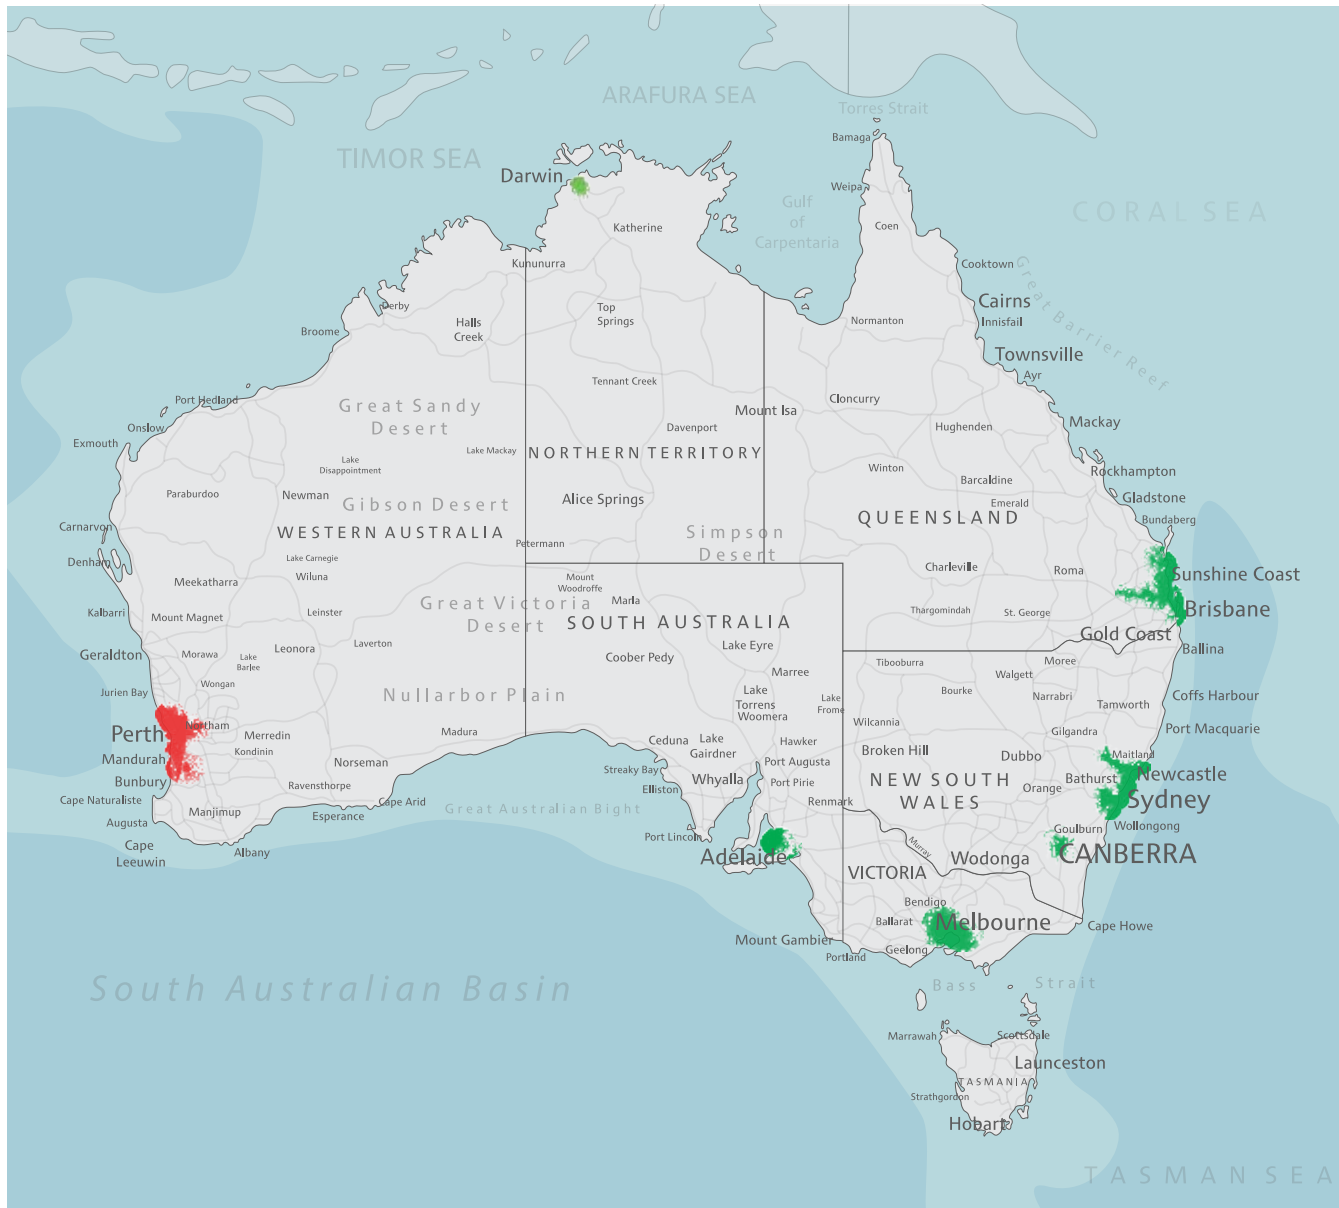

The Orion Network provides coverage in most capital cities and associated regional areas. The network has been upgraded to the new DMR Tier III Capacity Max network and mobile outdoor coverage is depicted in Green.

To provide better regional coverage VHF is also deployed starting in Victoria and is shown in Blue.

For Western Australia extensive coverage around Perth is provided on the existing Connect Plus network and is shown in Red.

Your local Orion partner has extensive experience on coverage as well as portable and temporary coverage solutions. Please contact your local partner today for detailed information.
